

Helping wash over 25 million little hands each year

Step 'n Wash enables children to safely wash their hands while keeping your restroom counters and floor dry and safe

- Increase safety by keeping your restroom counters and floor dry
- Cost effective way to increase customer service by eliminating the struggle of having to lift a 30 or 40 pound child up to reach the lavatory
- Self-retracting: after each use, the step automatically retracts back underneath the counter and out of the way for adult patrons
- Enables any existing lavatory to be accessible by both children and adult patrons
- Utilized more often than a diaper changing table at ½ the cost
- Address parents concerns about the spread of germs and viruses

This is one workout every parent and grandparent is happy to miss!

- Bolts directly to the restroom floor using the provided hardware
- Approved by risk management from Fortune 500 companies
- Designed with no pinch-points
- Material = Type 304 stainless steel
- Tested to support over 600 lbs
- 5 year warranty

"Step 'n Wash adds significant value for our passengers. Parents who travel — especially those with more than one child — know the challenges that come with lifting a toddler up to the faucet, maintaining an eye on their luggage and keeping their bodies balanced. Step 'n Wash effectively eliminates any restrictions previously placed on parents or supervising adults."

Doug Strachan, Airport Innovations Manager
Hartsfield-Jackson Atlanta International Airport
